### DETAILED ACTION

1. Amendment filed on August 15, 2005 has been entered.
2. Claims 21-40 are presented for examination.

### *Information Disclosure Statement*

3. This office acknowledges receipt of the following items from the Applicant:  
Information Disclosure Statement (IDS) filed on 09/15/2005.
4. Information disclosed and list on PTO 1449 was considered.

### *Specification*

5. The amendment filed 08/15/2005 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: **first address, second address and third address** in independent claim 21.

Applicant is required to cancel the new matter in the reply to this Office Action.

### *Claim Rejections - 35 USC § 112*

6. Claims 21-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 21-32, the limitation first address, second address and thirds address as being indefinite in original disclosure. The original specification and drawing do not provide any first address, second address and third address.

***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

8. Claims 33-40 are rejected under 35 U.S.C. 102(e) as being anticipated by Imamiya et al. (U.S. Patent No. 6,741,499).

Regarding claims 33-40, Imamiya discloses a method of testing a redundancy fuse circuit (Figure 1), comprising: latching a defective address (Column 1, lines 22-27) to a data latch circuit (Figure 1, 13) ; comparing an input address from a tester with the defective address (Column 1, lines 27-50); replacing a defective cell with a redundancy

Art Unit: 2827

cell when the input address is coincident with the defective address (Column 1, lines 27-34), executing a test on the redundancy cell (Column 1, lines 35-48); and programming the defective address to a fuse circuit after the test (Column 1, lines 45-56), and wherein the defective address is programmed when the redundancy cell is not defective (Column 1, lines Column 1, line 28), and wherein the defective address is not programmed when the redundancy cell is defective (Column 1, lines Column 1, line 28), and wherein the defective address is a row address (Column 1, 22-23), and wherein the defective address is a column address (Column 1, lines 22-23), and , wherein the defective address is programmed to a fuse device that is cut by a laser (Column 1, lines 24-27), and wherein the defective address is programmed to an electrical fuse device (Column 28-34), and wherein the input address is a test address (Column 1, lines 45-50).
